Abstract

Since Bitcoin has risen, the global market has experienced incredible growth. It has begun a new era with the possibility to trade and buy things with virtual money – cryptocurrencies. Bitcoin, as a decentralized digital currency, drives the attention of more and more people each day. There are cash machines on which you can buy it, or banks in which you can exchange your money for them. The key factor that made the Bitcoin idea revolutionary is how transactions take place between users directly without third parties. In short, each peer in Blockchain contains the history of all transactions, and they are completely decentralized. Who thought that the invention of Blockchain would affect the market so much, that it would create an entirely new market? The implementation of Blockchain technology created Bitcoin. Each day there are more and more cryptocurrencies on exchange platforms, where they can be traded.

About Investment Route

There are many traders that buy one cryptocurrency at a low price and sell it for a higher price, making a profit. Nowadays, profits can easily be made from your home or office, but how can you know when it's the right time to buy or sell some tokens? In order to do this, you must invest your time to research the market and gain knowledge about cryptocurrencies, understand how trading works, follow the news constantly, and analyze which factors will have an impact on trading activities, etc. In short, a lot of people simply don't have the time to be active cryptocurrency investors, but on the other hand, they don't want to miss-out on an opportunity either.

If that sounds familiar, Investment Route is the ideal place for you! A lot of investors make daily trades in cryptocurrencies and make a good profit from it. They are specialized investors who are skilled in knowing when it's the perfect time to buy and trade cryptocurrency. With Investment Route Platform, you have the opportunity to earn like an experienced investor.

Investment Route allows you to copy all cryptocurrency investors that you think you can make a profit from. You don't need to have knowledge about cryptocurrencies or trading at all, on Investment Route you can just see the most successful traders and you can copy them. You make just a simple registration on Investment Route platform and then choose which investors you want to copy, and you decide which amount of money you would invest. Next time when your chosen investor buys some cryptocurrency, the same would be done with your account. The trade will be replicated on your account with proportionate amount of cryptocurrency and when the investor decides to sell it or buy a new one, the same action would be copied to your account instantly when the investor takes an action. That means you don't need to follow each step of a successful investor and be sad if you have missed a good opportunity.

Investment Route Platform Features

Tracking everything

Investment Route is tracking everything: investors, smart contracts, tokens, and transactions. There will be no transaction done, no ICO announced that will be absent from the Investment Route database. Successful investors do not need to be registered on Investment Route platform, they just need to be successful in managing tokens at their accounts and we will have them in our database, track every single change on their accounts and provide other investors the opportunity to copy every single action automatically.

Copy

Investment Route users will be able to identify the best investors in the token world and with a few clicks, set up automatic copying. Each action that is performed by the copied investor will trigger an action on the user's account (the copier) that is proportional to the investor that is being copied: buying/selling tokens from/to ethers and participating in ICOs.

Social trading

Registered users will be able to follow other users or anonymous accounts, get notified for each action they perform, and interact with them. By registering, users can copy others or be copied by other users themselves. At the end of each quarter, 10% of the profits of Investment Route will be divided proportionally among the most successful users.

Badge system

Having tracked all those anonymous accounts there comes the question of how to differentiate them from each other and make it easier for users to decide who to follow and what to copy. We have defined a lot of badges that will be automatically assigned to the best investors, tokens, and ICOs. User will be able to add filters based on those badges and copy, for example, all top100 investors at once. This functionality quickly gives users a diversified portfolio with minimal risks.

ICO trending

By tracking every single ICO on one side and tracking successful investors on the other, Investment Route can build a bigger picture of the investment model, helping you answer the question of if you should invest or not. This approach is much more accurate than just measuring pure hype, because it is based on successful investors who have already made a huge profit on ICOs. This functionality will accurately tell you which ICO is the next big thing.

Investment signals

By tracking the top 100 investors on Investment Route we are able to recognize powerful signals that can be good indicators for investing. Registered users will be able to follow particular accounts and get notified if that account is participating in some ICO or if that account has increased the amount of some token.

Roadmap

In 2024. Q1:

- 1) List of top 100 and top 1000 investors - Daily updated list of top investors based on their performance.
- 2) List of top 100 tokens - Daily updated list of the best performing tokens based on the activities of top investors. If top investors buy some tokens, that should be a good sign for others to do the same.
- 3) List of top 100 ICOs - Daily list of the best performing ICOs based on the activities of top investors.

- 4) Integration badges on third-party websites - Each investor, token, and ICO will have its own badge image based on performance. These badges will be automatically updated and shown on other partner websites.

In 2024. Q2:

- 1) Improve tracking top investors - Integrating directly with Bitcoin explorer and improving the way that top investors are selected.
- 2) Improving investing signals - Measuring past performance and predicting future performance by improving investing signals.
- 3) Social platform, profiles, following - Users will be able to register profiles on the platform, to follow Bitcoin accounts and other profiles, to receive activities and signals, to write statuses.

In 2024. Q3:

- 1) Integrate exchange API - in order to copy investors, we should be able to buy/sell tokens at the market. In 2024, Q4 we are going to develop integration with a few exchanges.
- 2) Deposit/Withdraw - users will be able to deposit/withdraw money on their accounts.
- 3) Copy function - Developing the copy function, when selected investors perform an action it will be copied and performed on other accounts too.

In 2024. Q4:

- 1) Android and iOS applications - we are going mobile so that investors can copy others and check performance at any time.
- 2) First dividends - in this quarter we project the first profits. Since part of that is reserved for investors they can expect to receive their first dividends.

In 2025. Q1:

Investment Route API - we are going to develop our own API so that third party applications can integrate our features.

In 2025. Q2:

- 1) AI - we are going to implement artificial intelligence in order to provide the best investing signals.
- 2) Creating funds - based on investing signals we are going to develop a smart way of building investing will be able to be copied.

Why should you invest?

Although there are many people investing in it, cryptocurrencies haven't yet reached their peak. In the coming years, many people are going to have their first trade with cryptocurrencies. As it becomes mainstream, many people are going to try to invest in it because they don't want to miss an opportunity. With more or less effort many of them are not going to be successful. Investment Route will provide solutions for them.

By investing in Investment Route ICO, investors get SIGN tokens which they can either sell on the free exchange market or keep to receive part of Investment Route profit. That means in exchange for your investment in Investment Route you are going to get dividends in the future. In each quarter of the year, the current profit that the platform has made will be presented and one part will be sent to investors that own SIGN tokens. The profit that investors can gain depends on how many tokens they own and how much is collected in ICO as an investment for further project development.

In order to bring the whole idea to the market as soon as possible, we are looking for investments and are giving part of our profit in return each quarter! We are looking for a minimum of 1 million dollars and giving 30% of the profit in return. If during an ICO more than 1 million dollars is raised, more of the profit will go to investors, according to this schema:

					
Invested less than \$100.000	Invested over \$100.000	Invested over \$1 Million	Invested over \$5 Million	Invested over \$15 Million	Invested over \$25 Million
10% of profit will be dedicated for investors	20% of profit will be dedicated for investors	30% of profit will be dedicated for investors	40% of profit will be dedicated for investors	50% of profit will be dedicated for investors	70% of profit will be dedicated for investors

ICO details

One million SIGN tokens in total will be issued after the ICO which starts on March 24 and ends on April 21. 900,000 tokens are going to be issued for investors. The remaining 100,000 tokens are reserved for participants in the bounty campaign.

The ICO is successful if the amount of money raised exceeds \$500,000. That is the minimum threshold for the start of development. In order to bring the whole idea to the market as soon as possible, we are looking for **at least \$1,000,000**. That will be enough to meet the deadlines outlined in our roadmap. If we raise over 1 million dollars the excess funds will be spent on research and marketing activities.

For ICO purposes, we will develop an Ethereum smart contract which will ensure that everyone who sends ETH to it will receive a proportional amount of SIGN tokens. For this reason it will only be possible to **participate in the ICO with Ethers**.

ICO bonuses

There are different bonuses that investors can get by investing which can bring them into the position to have SIGN tokens for a better price.

Subscription bonus

Each investor that has subscribed to Cryptocop mailing lists before ICO begins will get +5% bonus on top of the invested amount. The investor just needs to leave his email address and wait for ICO to begin. After he makes an investment he needs to inform the Cryptocop team by sending his Ethereum address, from which they are sent to the crowd sale contract. Investors shouldn't worry about spam because Cryptocop is not going to send unnecessary mail or even provide email to a third party.

Bonus based on invested amount

In order to reward investors who invested more, there are different bonuses based on the total invested amount. Please see the table below for details.

Which bonus you get if you invest	> \$1.000	> \$3.000	> \$30.000	> \$300.000
Bonus on top of invested	+ 5%	+ 10%	+ 20%	+ 30%

Bonus based on time of investment

There are also different bonuses based on the time when an investment is made. The first two days of the ICO are the best time for investing because all investors in that period are going to get 20% more tokens! Please see the table below for more details.

				
24 – 25 Mar First 2 Days	26 Mar– 1 Apr First week	2 – 8 Apr Second week	9 – 15 Apr Third week	16 – 21 Apr Until the end
20% bonus	15% bonus	10% bonus	5% bonus	2,5% bonus

Other benefits

Not only are there bonuses for investors but also other benefits. Investors who invest more than 3.000\$ are going to get at least one year of use on Investment Route without any fee. Please see the table below for more details.

Which bonus you get if you invest	> \$1.000	> \$3.000	> \$30.000	> \$300.000
Use CryptoCopy without fee	-	1 Year	2 Year	Lifetime
Influence on decisioning	-	-	Closed group	CEO's phone number

Because it is important to have the right information at any moment we have defined the possibility of making an influence on decisions for our best investors. They were able to get in touch with co-founders even through closed groups or to have direct contact with our CEO. Having that possibility, big investors had the possibility to get informed of the next big steps and they will be prepared for acting at the free exchange market.

Who we are?

We are a team of experienced Software Developers and Product managers, from Canada and the United States. Our international team is truly in love with blockchain technology and we have many ideas on cryptocurrencies and blockchain that we can't wait to implement! Investment Route is one of them, which we are going to quickly develop and bring to the market. Whether like us, you are passionate about new technology, or simply looking for an easy way to diversify your assets; we're always ready to welcome new members even after the ICO.

Conclusion

You don't need to follow cryptocurrency news and rumors in order to make a profit. All you need is to follow successful cryptocurrency investors! Investment Route has to date, in our database, some of the most successful investors that are trading with cryptocurrencies. Are you interested in the cryptocurrency market? Do you want to invest and make a profit, but don't have the time to commit? No worries, with Investment Route your trades can be completely automated. You just need to make an account on <https://investmentrouteinc.com> and choose which investors you want to copy.
